PRODUCT RELEASE

Xinet

Xinet 2025.3.3

March 2025

IGNITETECH

RELEASE SUMMARY

The Xinet 2025.3.3 release includes

- Enhanced permission management through improved Active Directory group support for access control lists
- Optimized search capabilities for text embedded within Adobe Illustrator files
- Critical stability improvements addressing database memory management
- Fixed compatibility issues with InDesign plugin when linking to high-resolution files
- Improved system logging with enhanced message details

Resolved Issues

- Fixed issue where Active Directory groups were not appearing in access control lists
- Resolved search functionality for text content within Adobe Illustrator files
- Corrected InDesign Plugin error when linking to high-resolution files across volumes
- Enhanced system logging with improved message clarity
- Fixed database memory management to prevent out-of-memory crashes
- Resolved issue with custom date fields in Advanced Search functionality

Installation

The Installation Instructions can be found on the **Knowledge Base**. You may find the installation files on the **Xinet Portal**. RH9 requires one additional pre-installation step. If you encounter any issues, please contact our **support team**.

Important Notice: Samba Integration Changes

The previous release introduced fundamental changes to our Samba integration architecture. We have transitioned from our proprietary compiled Samba version to leveraging standard system Samba packages. This architectural shift involves compiling Xinet VFS modules specifically for your system's Samba version, ensuring better compatibility and maintainability.
During the upgrade, our installation scripts automatically detect if your system's Samba version is compatible. If you experience any integration issues or require assistance with

specific configurations, please don't hesitate to contact our Customer Support team for dedicated assistance and guidance.

Server Prerequisites

- SERVER should be a Red Hat Enterprise Linux (RHEL) Server 64-bit version 9.0 or above
- Should have a valid RedHat subscription to download **codeready** packages
- Samba version should be 4.20.2. If you need Xinet for another version of Samba, please contact Customer Support.

Installer will download the required RHEL 9 dependent libraries and services which require patching to make them work along with XINET.

Certified Platforms

Below are the component versions that are officially supported by IgniteTech for this version of Xinet.

SERVER	Operating systems: Red Hat Enterprise Linux (RHEL) Server 64-bit version 9.1 with Samba 4.20.2
CLIENT	Operating Systems • Mac OS 10.15 • Windows 10
PLUGINS	Browsers • Chrome, Safari, Firefox (current latest versions for supported operating systems) Xinet Adobe Plugins • MacOS: **Adobe InDesign** and **Adobe Illustrator** **2024 and 2025** • Windows: **Adobe InDesign** **2024 and 2025**

Additional Information:

If you would like to upgrade your support plan to take advantage of the **Unlimited Program features**, please contact us for more information. If you have any questions

about this release, please open a **support ticket** and our support team will be happy to assist you.

To ensure all of the appropriate staff within your organization are informed about important product updates, please notify **success@ignitetech.com** with emails for individuals who should receive these announcements.
